The World Premiere of a Smile.

TENTE smiles:-)

Castors you can love.

Enjoy a new design idea, the only one of its kind in the world. TENTE smiles:-) is a range of castors developed especially for the colourful and lively world of children's bedrooms.

With these friendly faces, the different smiles:-) castors open up completely new design possibilities for furniture designers and manufacturers. As robust furniture castors made of synthetic material with or without a brake, they make almost all children's furniture movable and give it that extra special flair: Chests of drawers, swivel chairs, children's beds, cradles, toy containers, stands on wheels, bedside tables, computer tables, desk chairs, flower pots, trolleys and much more – there are no limits to your imagination when using the new “smiles”.

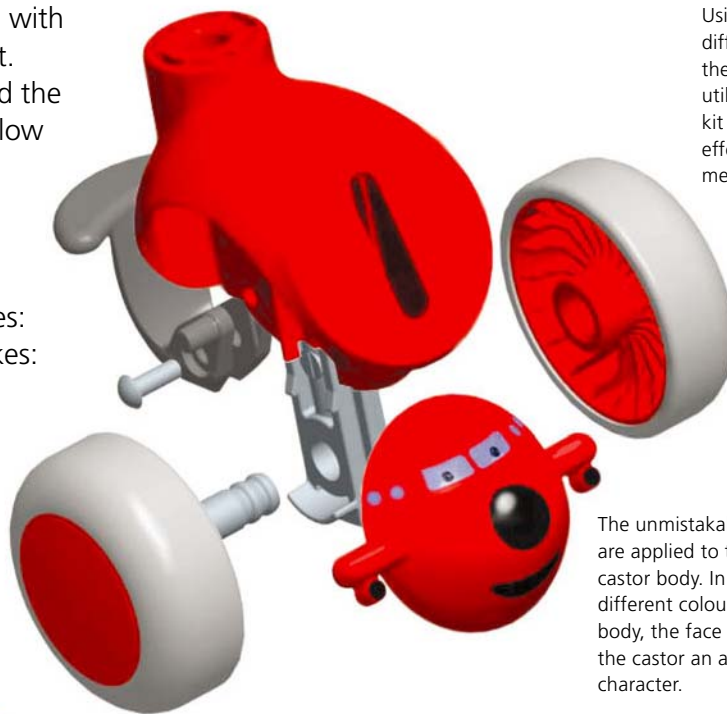

Especially when it comes to the castors' appearance. One colour or multi-coloured, synthetic components in different colours, painted or printed to your specifications, new faces – no problem at all for TENTE! Making an individual smiles:-) castor to your specifications is a challenge that our designers and technicians will meet with a smile! To the usual TENTE quality standard, of course.

Do you have any other ideas? For example smiles:-) on displays or clothes stands for toys or children's fashions? The smiles:-) cow used with sales aids for dairy products? The aircraft for your airline, at airports or in travel agents'? We're there!

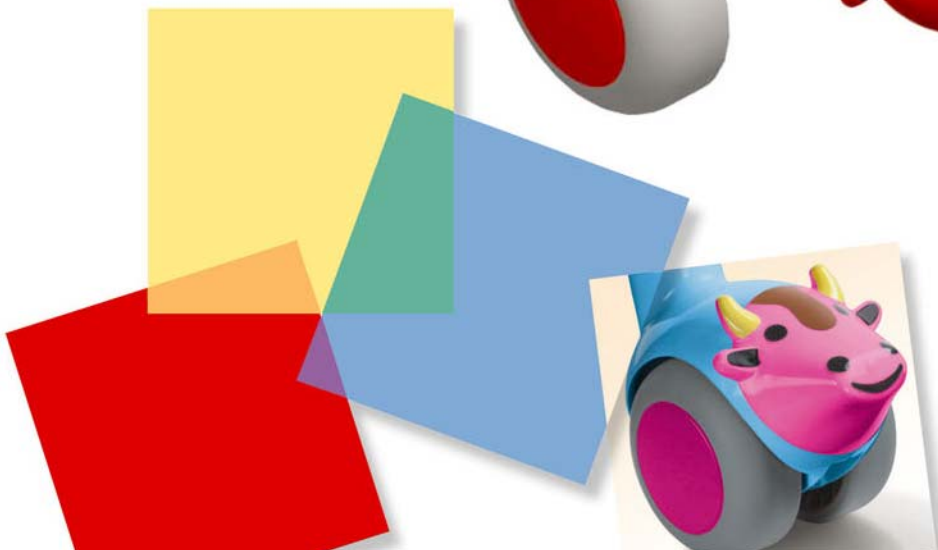

Colour, shape and imagination: smiles:-) make your dreams come true!

Be inspired and play around with the flexible smiles:-) concept. Coloured synthetic parts and the paint finish of the castors allow practically any conceivable colour tone. The combination of components in different colours offers you additional design possibilities: Bodies, castors, treads, brakes: the smiles:-) faces and their patterns – choose to suit your mood!

Using castors of different colours is the easiest way of utilising the smiles:-) kit as a simple but effective design medium.

The unmistakable faces are applied to the castor body. In a different colour to the body, the face gives the castor an additional character.

smiles:-) **grrr**

"I'm the cheeky little grizzly bear in the smiles:-) family. By nature I get along great with everything that taps, taps, taps along the floor! Especially of course with my good friends moooh, fiiiep and ddzzzh!"

smiles:-) **roar**

"Although I can't take off, every child's room makes the perfect runway for my smooth-running TENTE wheels."

smiles:-) **mo**oo

"If you want less colour but castors that are still fun, I'm the one for you. Like all smiles:-) castors, I also come with the handy brake at the back."

TENTE smiles:-)

Furniture castors Series 5520
